

# Long COVID in Harris County

**Luis Ostrosky-Zeichner, MD, FACP, FIDSA, FSHEA**  
Professor of Medicine and Epidemiology and Chief, Division of Infectious Diseases  
McGovern Medical School at UTHHealth Houston

**Micaela Sandoval, MPH, PhD**  
Assistant Professor  
Department of Epidemiology  
UTHHealth Houston School of Public Health

March 20, 2024

4-5 PM CT, VIRTUAL

Long COVID is a significant public health issue, and mounting evidence suggests many patients experience substantial and long-lasting health changes following even apparently mild COVID-19 episodes. Dr. Sandoval will present results from the Harris Cares: Embrace HOPE long COVID study. Dr. Ostrosky-Zeichner will discuss pathophysiology, presentations, clinical features, and outcomes of the patients who experience long COVID that he evaluates at the UTHHealth COVID Center of Excellence. Clinical trials in the area will also be discussed.
