

TEPHI TALKS SEMINAR SERIES

Improving Health Through Data

Lee Spangler, J.D.

Executive Director, Texas All-Payers
Claim Database
Center for Health Care Data

Associate Professor
UTHealth Houston School of Public Health

April 16, 2024

1-2 PM CT, VIRTUAL

Analyzing healthcare claims data can help identify areas of need within communities, drive informed policy development, and help build preventive programs that can positively impact health outcomes. In this talk, Lee Spangler, J.D. will provide an overview of how health data can be made accessible, accurate, and actionable for Texas, and how it can be used to find opportunities to enhance systems, and the health of both individuals and communities.
